

HackTable

Adit Magotra of Class X B took part in HackTable, an **International-level hackathon** hosted by Students from the Tesla STEM High School (Redwood, Washington, USA), from 24th to 25th July 2021. This year, the 36-hour Hackathon welcomed **450+ participants** from all around the globe.

He developed a locally deployed program that can find the transcript, convert it to a summary and also return all sentences where a specific keyword was mentioned. He was awarded a Special Mention by Syml.ai (Sponsor Company backed by Amazon) along with exclusive Syml.ai merchandise.

Technolympics

Accolades Technolympics was an interschool tech event organised by Venkateshwar Global School, New Delhi in August. Adit Magotra of X B was awarded the first prize in the AI Health Bot Event.

He built a CoviBot, an Artificially Intelligent chatbot deployed on the web that can answer queries regarding COVID-19 and also provide you with audio output of the answer.
