

## INITIATIVE BY YOUNG SANSKRITIAN

The lockdown imposed to curb the spread of coronavirus has affected all of us but has a very big impact on the stray animals, especially those present in the markets and near corporate setups. The strays have no means of feeding themselves since the offices, restaurants, roadside eateries, where they had easy accessibility to food, are closed. They are starving and their food sources are diminishing.

With the help of the policemen posted on various check-posts and Whatsapp and social media groups, Alankrita Malhotra of class X- D is surveying and taking count of the number of dogs that have to be fed. She is feeding 150 dogs with 2 meals a day. She raised 76,200 rupees as a part of her campaign to feed the Strays.

Sanskriti School applauds Alankrita's initiative.
