

# **Maths Day (2021-22)**

The much-awaited Junior school Math Day was celebrated on 18<sup>th</sup> June. Children had fun playing Math games and were involved in activities that challenged their minds to become better thinkers and led to the development of skill of logical reasoning.

Math Day was celebrated in Nursery with a fun activity using the Aakar Parivar kit. The children enjoyed creating objects with the basic shapes in the kit.

Prep students enjoyed Maths Day activity using origami sheets. Students created different things out of basic shapes like, fish, tree, house, train, ice cream cones and a car. They enthusiastically coloured the sheets, folded the origami and were pleased with their creations!! It was a great learning experience for everyone.

Grade one explored the amazing world of shapes using ice cream sticks. They created different things using basic shapes like triangle, square, rectangle to make fish, bird, dinosaur, house and a photo frame.

Second graders did a hands-on activity of creating shapes with straight lines. They used ice cream sticks to create the three-sided triangle and went on all the way up to creating a ten-sided decagon.

Children of Grades III, IV and V enjoyed playing with Tangrams as it sharpened their visual and spatial skills and developed an understanding of how a shape can be broken into various geometric shapes. Besides Tangrams, children were also involved in activities that helped develop Mathematical minds.

# Some glimpses of the Maths Day
