TISB *ml*-THON

Adit Magotra of 10 B has secured 4th position in the TISB *ml*-THON, the biggest pure Machine Learning competition for high schoolers in India. This year, it received over 550 submissions from 100+ participants. It was hosted by The International School, Bangalore and sponsored by companies like Dell and StoreSpace. He also received the **Community Contribution Award** along with a **c**ash Prize of • **14,000** and a promotion to final round of Slingshot's (CMU Startup) verification interview

His project was to build a machine learning model that could predict whether a customer would make deposits in a bank based on factors like their Bank balance, age, employment status, housing, etc.
State-of-the-art Machine Learning techniques combined with the best Machine Learning models with Neural Networks were used to achieve a log-loss score of 0.28.

Congratulations Adit!!
